

Website UI Redesign

Event Hub – Website Redesign

Introduction

The purpose of this project is to redesign the user interface of an event booking platform called Event Hub. The redesign focuses on improving usability, visual appearance, and user experience for both mobile and desktop users. The interface was designed using Figma with a modern and clean layout. Special attention was given to responsive design, visual hierarchy, spacing, and consistency throughout the screens.

Objective

The main objective of this project is to create a user-friendly and visually appealing interface that allows users to easily browse events, view event details, and register for events smoothly.

Heuristic Evaluation

Before designing the interface, usability issues were identified in the existing design. The following improvements were considered:

- Simplified navigation structure
- Better visual hierarchy
- Improved readability
- Consistent button styles and spacing
- Cleaner layout for mobile screens
- Responsive design for desktop and mobile devices

Design Process

- **Research and Planning**

Understanding the requirements of an event booking platform and identifying important user needs.

- **Mood Board Creation**

Soft purple and lavender colour palettes were selected to create a modern and calming user interface.

- **Style Guide Preparation**

Consistent typography, colours, icons, and button styles were maintained across all screens.

- **High-Fidelity Mockups**

Detailed UI screens were designed in Figma for both mobile and desktop layouts.

Designed Screens

Outcome

This project helped improve practical knowledge in:

- UI/UX design principles
- Responsive design
- Visual hierarchy
- Layout structuring
- Figma prototyping and mockup creation

The redesigned interface provides a smoother and more engaging user experience for event booking and registration.

Conclusion

The Event Hub UI redesign project successfully enhanced the overall usability and appearance of the platform. The final design maintains consistency, accessibility, and responsiveness while creating a modern experience for users across different devices.
